Tehran

SUMMARY

Front-End Developer with over **4 years of hands-on experience** in crafting modern, high-performance web applications using **React.js**, **Next.js**

Passionate about building **responsive, pixel-perfect, and user-centered** interfaces that deliver seamless experiences across both desktop and mobile.

Skilled in creating **scalable architectures**, implementing **best UI/UX practices**, and collaborating in **agile teams** to bring ideas to life.

Always eager to **learn emerging technologies** and take on **challenging projects** that make a meaningful impact in the digital world.

Professional Experience

RAYMAND GNSS

React/Next Developer

2022 – 2026 | Tehran

The company operates in the **GNSS and GIS** domain, developing specialized software panels that provide innovative solutions for **spatial data management and analysis**.

In addition to software development, the company also sells **surveying devices**, and our team is responsible for building dedicated software platforms for each device.

As a front end developer, I actively contribute to the **design and implementation** of various panels in this field.

Tech stack: React.js, Next.js, TypeScript, Redux, Material-UI, Redux Toolkit, Openlayers, Three.js, Style-components,

SATTEC - ساتک

React and Next Developer

2023 – 2024 | Tehran

Part-time & Remote Project Contributed to the development of a **Commercial Management Admin Panel** — a **complex, data-intensive platform** designed for managing large-scale commercial operations.

Implemented a **scalable and high-performance architecture**, optimized user workflows, and ensured system reliability across high data volumes.

Tech stack: Next.js, TypeScript, Material-UI, Redux Toolkit

Ghadir Company

React Developer

2021 – 2022 | Tehran

I also have experience working with a company in the **cryptocurrency industry**. Initially, I worked as an **intern for three months**, and after that period, I joined the development team as a **full-time developer**.

Projects

MyRaymand

Web application for managing and tracing devices, including features for device ownership transfer and Ticketing System.

Tech: React.js, Redux.js, Leaflet, TypeScript, styled-components

Ray3D

Application for processing images and creating 3D models featuring a job queue.

Tech: React.js, TypeScript, React-Query, Zustand, Three.js, Styled-components

RayCloud

This platform is designed for survey data management, visualization, and monitoring, fully integrated with the RaySurvey mobile application

Tech: React.js, TypeScript, Zustand, React-Query, MapBox, Styled-components

NamaPeyma

Nama Peyma is a web-based platform developed to manage and showcase virtual tours and 3D model projects. The system is composed of two main components: a public website and an admin management panel.

Tech: Next.js, TypeScript, Tailwind, Redux-Toolkit, React-Query, Three.js

Portfolio

My personal portfolio showcasing my skills, technologies, and a collection of my live projects.

Tech: Next.js, TypeScript, Tailwind, Zustand, PWA,

The company was developing a powerful and advanced cryptocurrency platform. Although the project faced challenges and was eventually discontinued, it gave me valuable experience in building scalable UIs, managing global state using Redux, and integrating with REST APIs.

I also contributed to form validation, component structuring, and implementing routing logic using React Router.

Tech stack: React.js, TypeScript, Redux, Material-UI, Sass

Skills

Frontend :

- React.js
- Next.js
- JavaScript
- TypeScript

State management

- Redux
- Redux-Toolkit
- Zustand
- React-Query

Styling :

- Material-UI
- styled-components
- tailwindcss
- bootstrap

GIS/Web Mapping

- OpenLayers
- react-leaflet
- Three.js
- MapBox

Tools & Technologies

- Git
- lodash
- formik
- react-hook-form
- PWA
