SUMMARY

Frontend Developer with 4+ years of experience building scalable, high-performance web applications using React.js and Next.js.

Strong background in developing complex data-driven interfaces, optimizing frontend performance, and managing application state in modern web products.

Proven ability to deliver responsive, user-centered experiences in Agile environments with a focus on usability, scalability, and maintainability.

Professional Experience

RAYMAND GNSS

React/Next Developer

2022 – 04/2026 | Tehran

- Developed specialized web platforms for high-precision GNSS/GIS surveying devices, enabling real-time spatial analysis and improving data visualization performance by 30% for industry-grade equipment users.
- Architected interactive mapping dashboards using **OpenLayers** and **Three.js**, empowering users to manipulate 3D spatial data and manage large-scale geographic datasets with high responsiveness.
- Optimized data-fetching and state management with **React Query** for intelligent client-side caching and **Redux Toolkit / Zustand** for global state orchestration, reducing network overhead and improving UI responsiveness.
- Standardized frontend architecture using **TypeScript** and **Styled-components**, improving code maintainability and reducing bug reports by 30%.
- Collaborated with cross-functional teams to integrate complex GIS APIs, ensuring consistent and high-performance data delivery across interactive spatial panels.

SATTEC - ساتک

React and Next Developer

2023 – 2024 | Tehran

- Architected and scaled a data-intensive **CRM Admin Panel** using **Next.js** and **TypeScript**, designed to handle high-volume commercial operations and complex data throughput.
- Engineered multi-threaded processing via **Web Workers** to offload heavy computations, maintaining a smooth and responsive UI while rendering thousands of data rows simultaneously.

Projects

MyRaymand

Web application for managing and tracing devices, including features for device ownership transfer and Ticketing System.

Tech: React.js, Redux.js, Leaflet, TypeScript, styled-components

Ray3D

A program for displaying 3D models with capabilities such as drawing, measuring, calculating volume, etc. has been implemented on the model.

Tech: React.js, TypeScript, React-Query, Zustand, Three.js, Styled-components

RayCloud

This platform is designed for survey data management, visualization, and monitoring, fully integrated with the RaySurvey mobile application

Tech: React.js, TypeScript, Zustand, React-Query, MapBox, Styled-components

NamaPeyma

Nama Peyma is a web-based platform developed to manage and showcase virtual tours and 3D model projects. The system is composed of two main components: a public website and an admin management panel.

Tech: Next.js, TypeScript, Tailwind, Redux-Toolkit, React-Query, Three.js

- Improved application performance through efficient state management with **Redux Toolkit** and fine-tuned data-fetching strategies, significantly reducing page load times.
- Built a high-performance modular UI with **Material-UI**, delivering a consistent and intuitive experience across all administrative dashboards under large dataset conditions.
- Reduced UI lag and memory footprint through **data memoization** and component lifecycle optimization, resulting in a **35% increase in operational throughput** for end-users.

Ghadir Company

React Developer

2021 – 2022 | Tehran

- Contributed to building a large-scale **cryptocurrency platform**, developing scalable user interfaces and maintaining component architectures with **React.js** and **TypeScript**.
- Integrated **REST APIs** within an agile team, ensuring reliable and consistent data synchronization across the application.
- Streamlined development workflows by enforcing consistent component structures and leveraging **Sass** for scalable, maintainable styling.

Education

B.Sc. Software Engineering

Islamic Azad University

09/2025 – Present

Currently pursuing a B.Sc. in Software Engineering through an online program

B.Sc. Sports Management

Fanni Pesaran No.1 University

2014 – 2018

Portfolio

My personal portfolio showcasing my skills, technologies, and a collection of my live projects.

Tech: Next.js , TypeScript,
Tailwind, Zustand, PWA,

Skills

Core Frontend :

- JavaScript(ES6+)
- TypeScript
- React.js
- Next.js

State management

- Redux
- Redux-Toolkit
- Zustand
- React-Query

Styling :

- Tailwind CSS
- Styled-components
- Material-UI
- Bootstrap

GIS & Mapping

- OpenLayers
- Leaflet
- MapBox
- Three.js

Tools & Ecosystem

- Git
- Web Workers
- Formik
- React Hook Form
- PWA
- Vitest
- Figma
